User Guide

Customer, Staff and Administrator instructions

Team 1 - T3.2605.E1.FPT | 7 November 2026

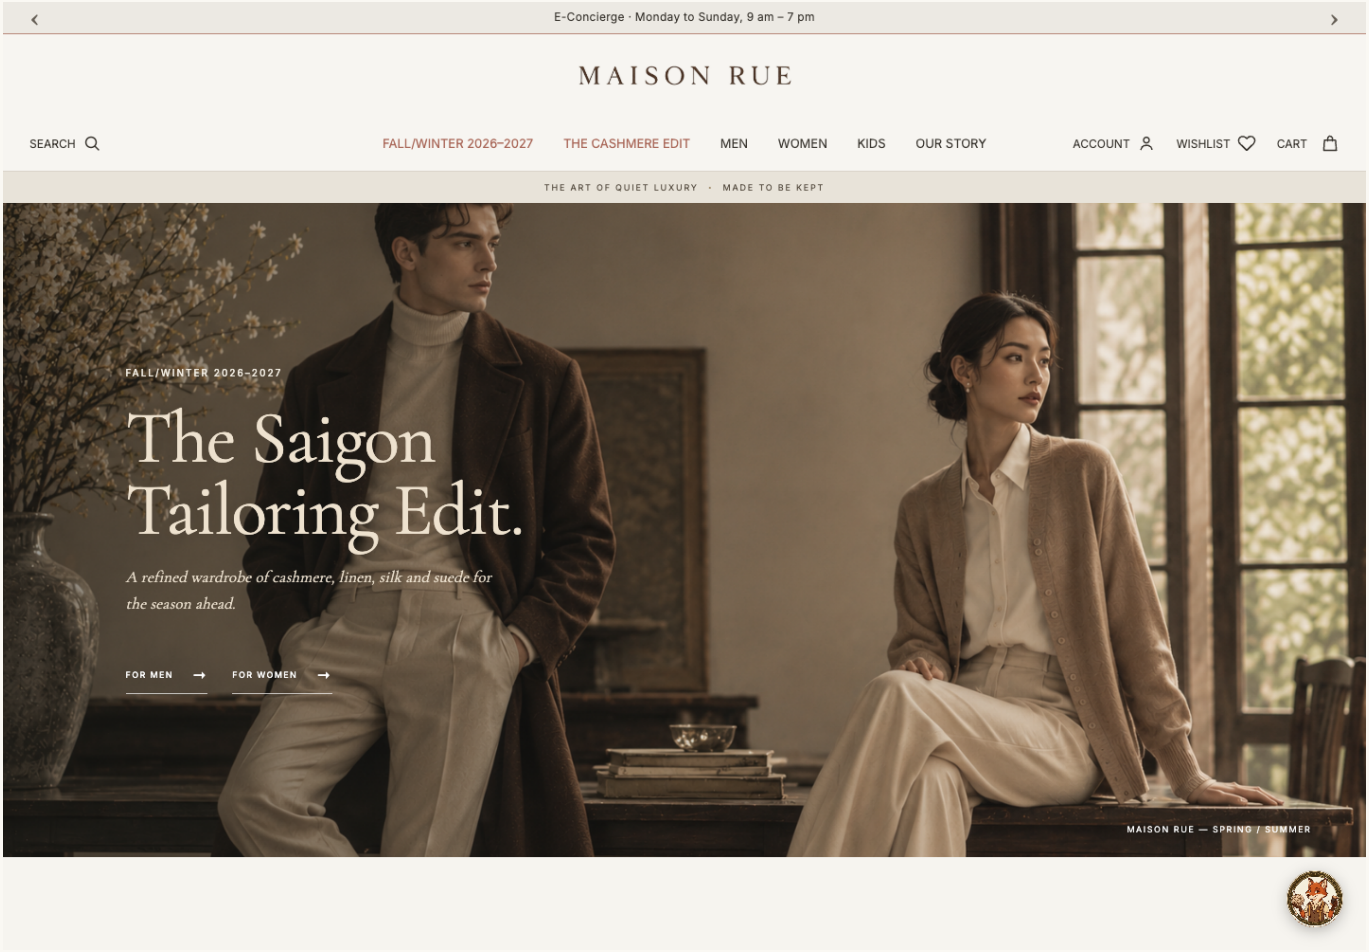

This guide uses the current local website. Screenshots show demonstration records, whose values and availability may change.

Navigation
Customer: /login and /account/orders
Staff: /staff/login
Administrator: /admin/login

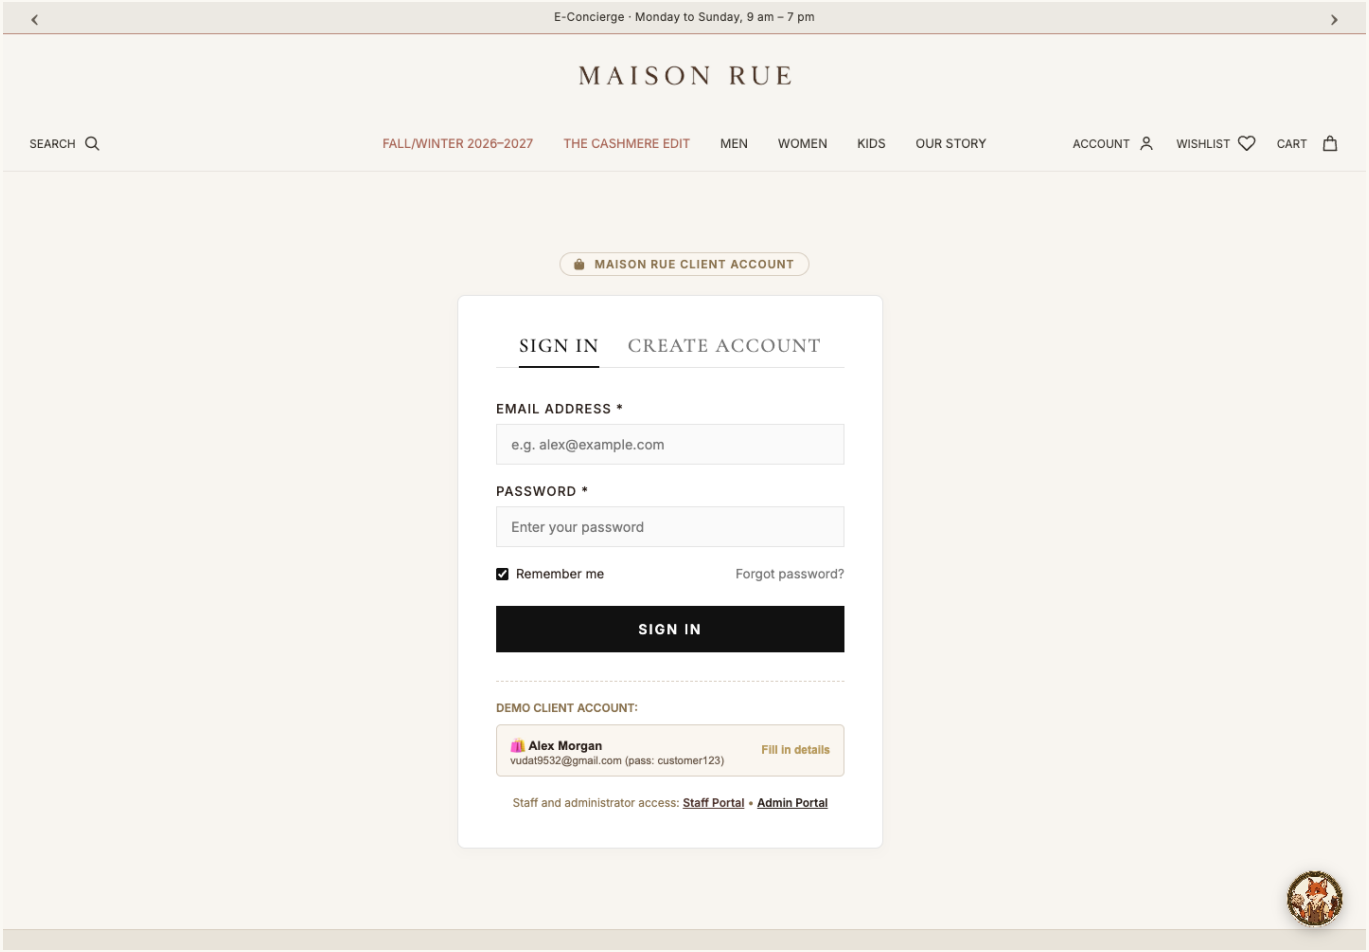

01 Home page

Open /. Use the collection navigation or search to begin browsing. Account, Wishlist and Cart are available in the header.

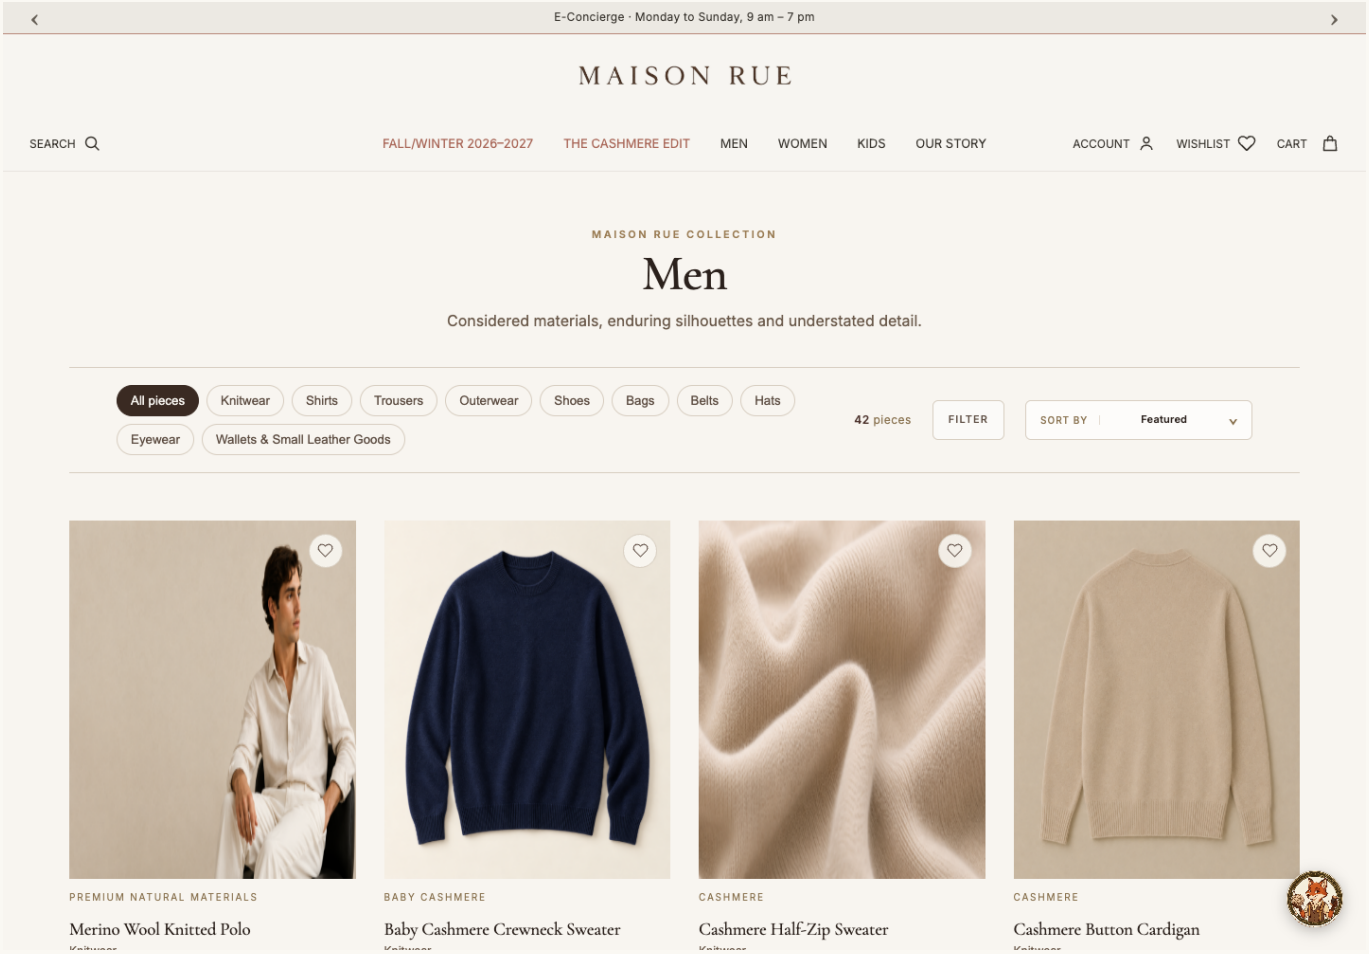

02 Login and registration

Open /login. Use Sign in for an existing customer account or Create account to register. Staff and administrators use their separate portals.

03 Browse search and filter

Open Men, Women or Kids, or choose a collection. Use category tabs, Filter and Sort by. Set a price range or select colours, then open a product.

04 Select a product variant

Choose a colour and size, use Find my size if needed, and select quantity. Add to bag after checking availability. The heart saves the item to Wishlist.

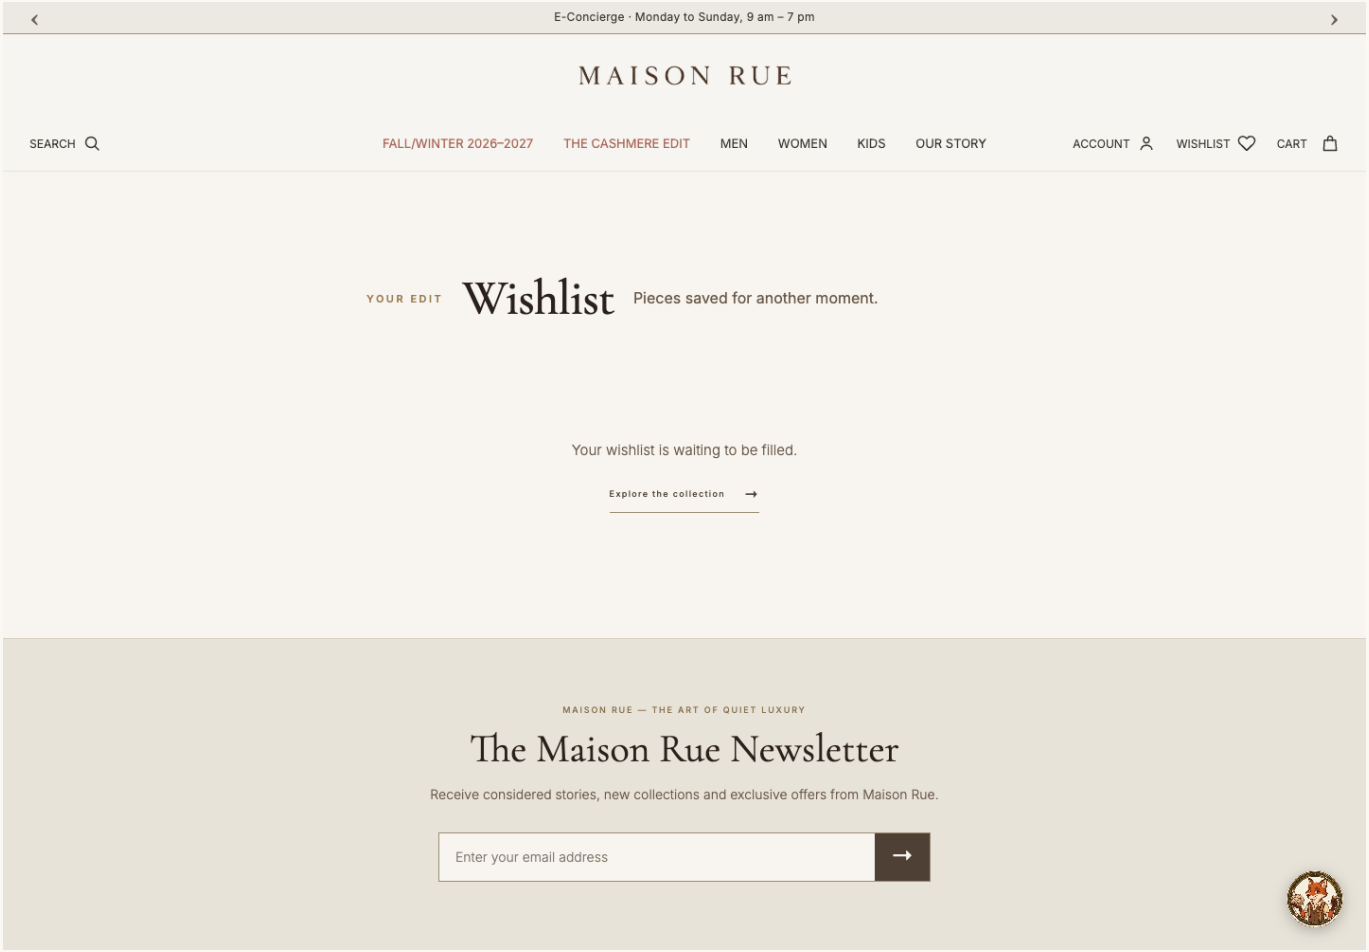

Further information

Expand Product details, Model and fit, Care and Maintenance and Returns and Exchange. Complete the Look suggests complementary pieces; customer reviews appear where available.

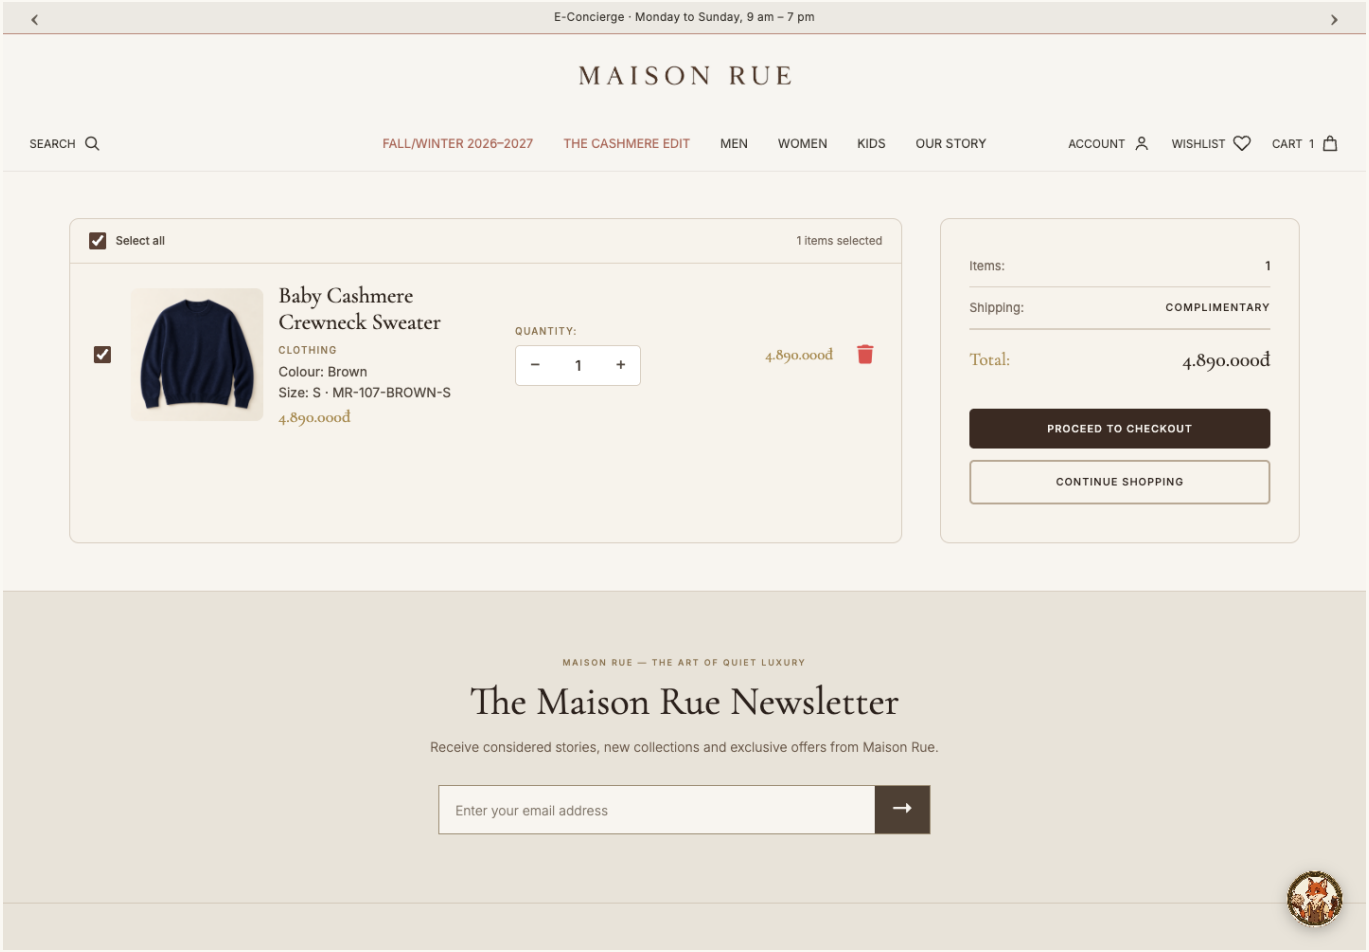

05 Guest wishlist

Save products through heart icons. /wishlist works without login. Guest favourites persist on the same browser; signing in merges them into the account.

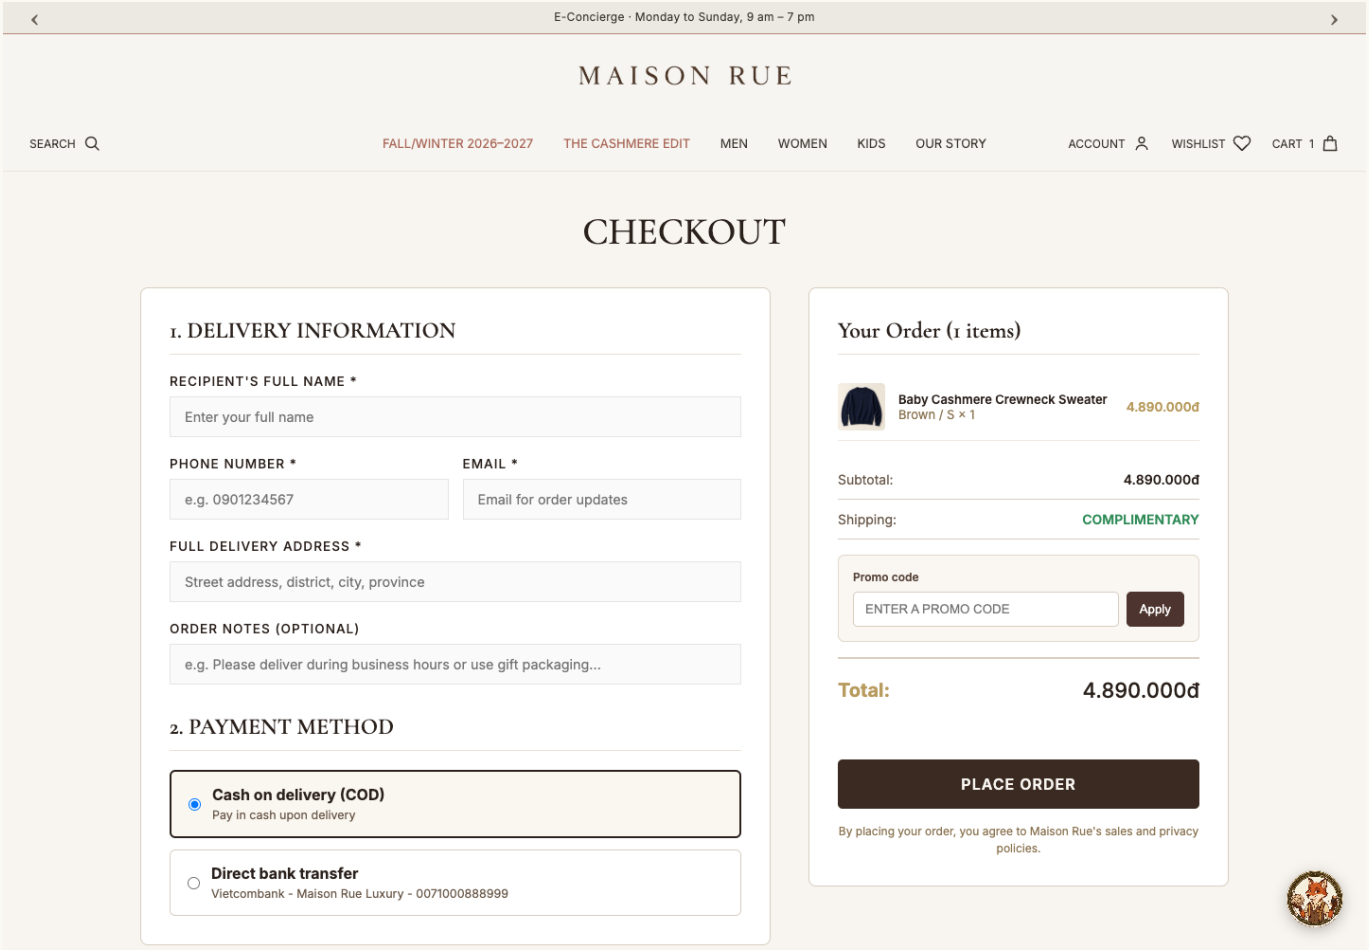

06 Shopping bag

Review selected products, variants and quantities. Remove unwanted items or select items for checkout. Reduce quantity if the stock warning appears.

07 Checkout

Enter delivery details or choose a saved address. Apply an eligible promo code. Choose COD or bank transfer and review the total before submitting an order.

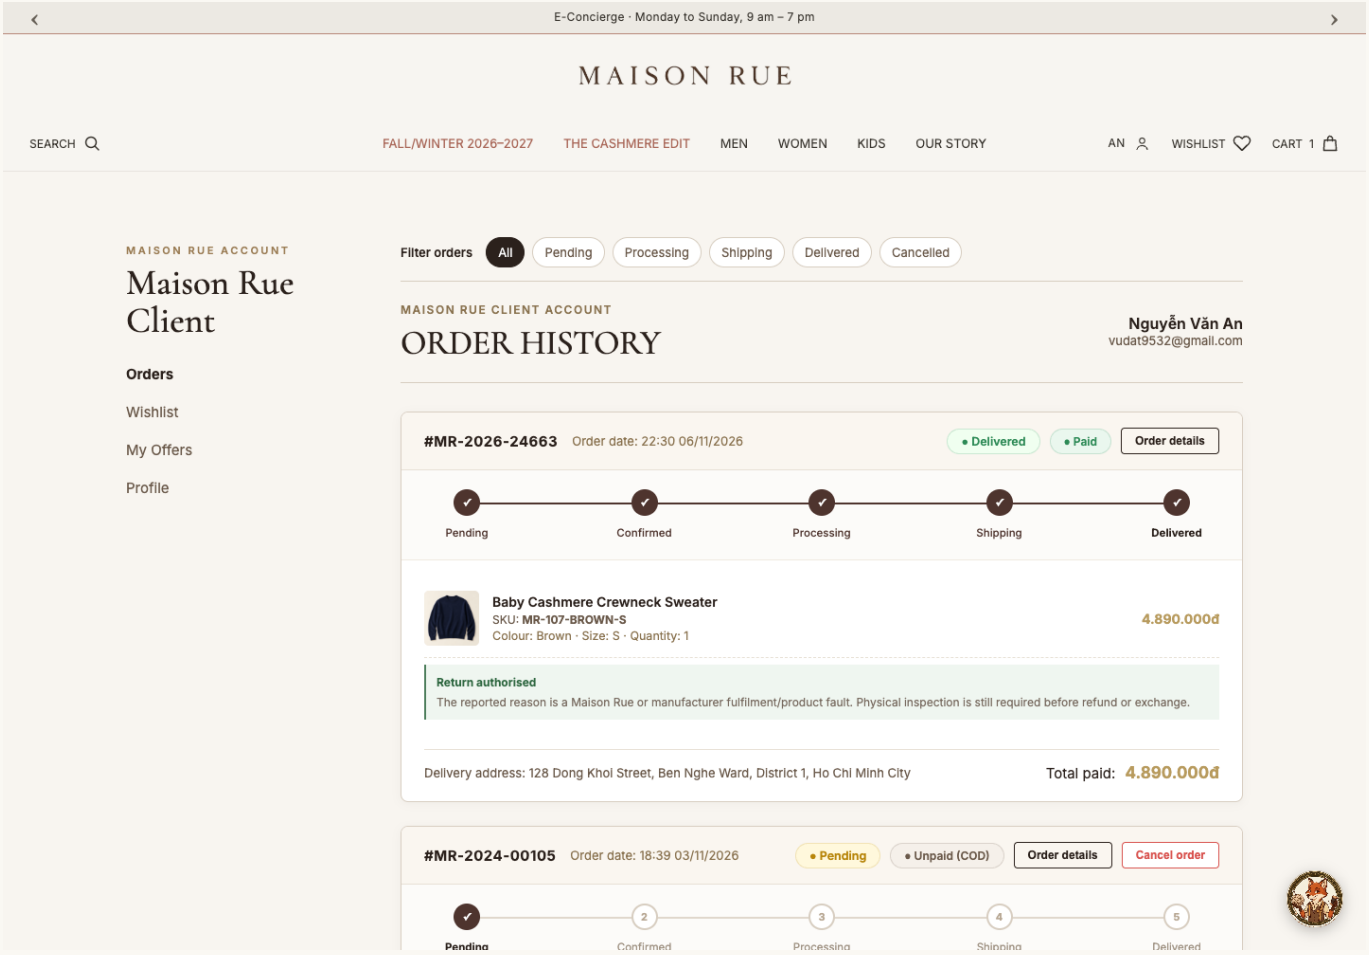

Payment note

An order record or recorded refund is not proof of an automatic payment gateway transaction. Follow the chosen payment instructions and subsequent staff confirmation.

08 Order history

Open Account then Orders. Filter by delivery status and open Order details. A delivered item can expose Request return / refund when eligible.

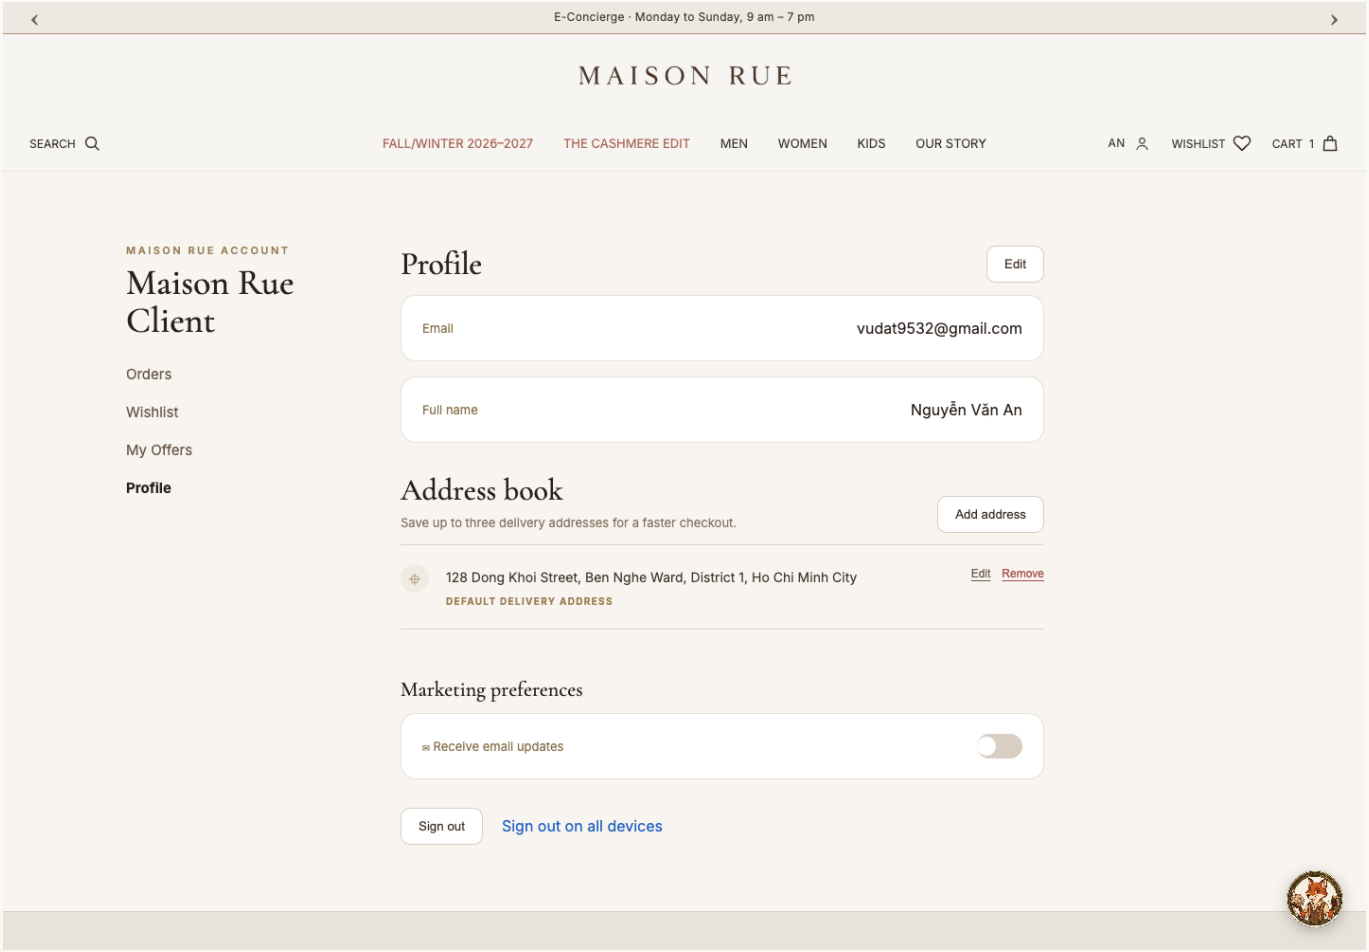

Return request steps

Choose request type, reason and quantity. For exchanges choose a valid preferred size and colour. Add details and confirm condition where required. Submit once and read the returned decision. No photo is required in the account form.

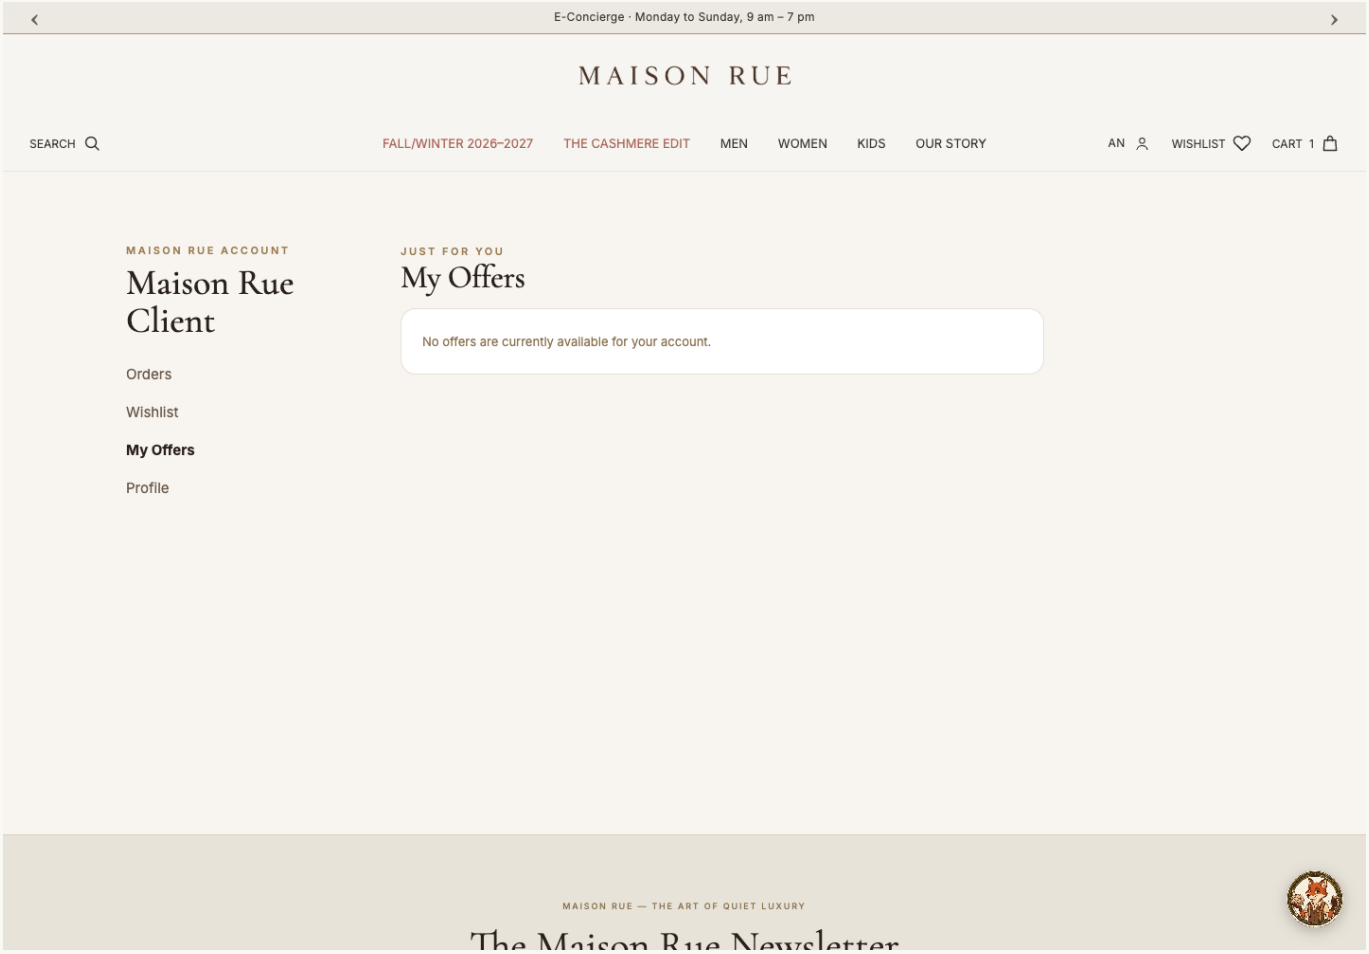

09 Profile and delivery addresses

Open Account then Profile. Edit profile information, add or edit delivery addresses and set a default. The address book supports three addresses in total.

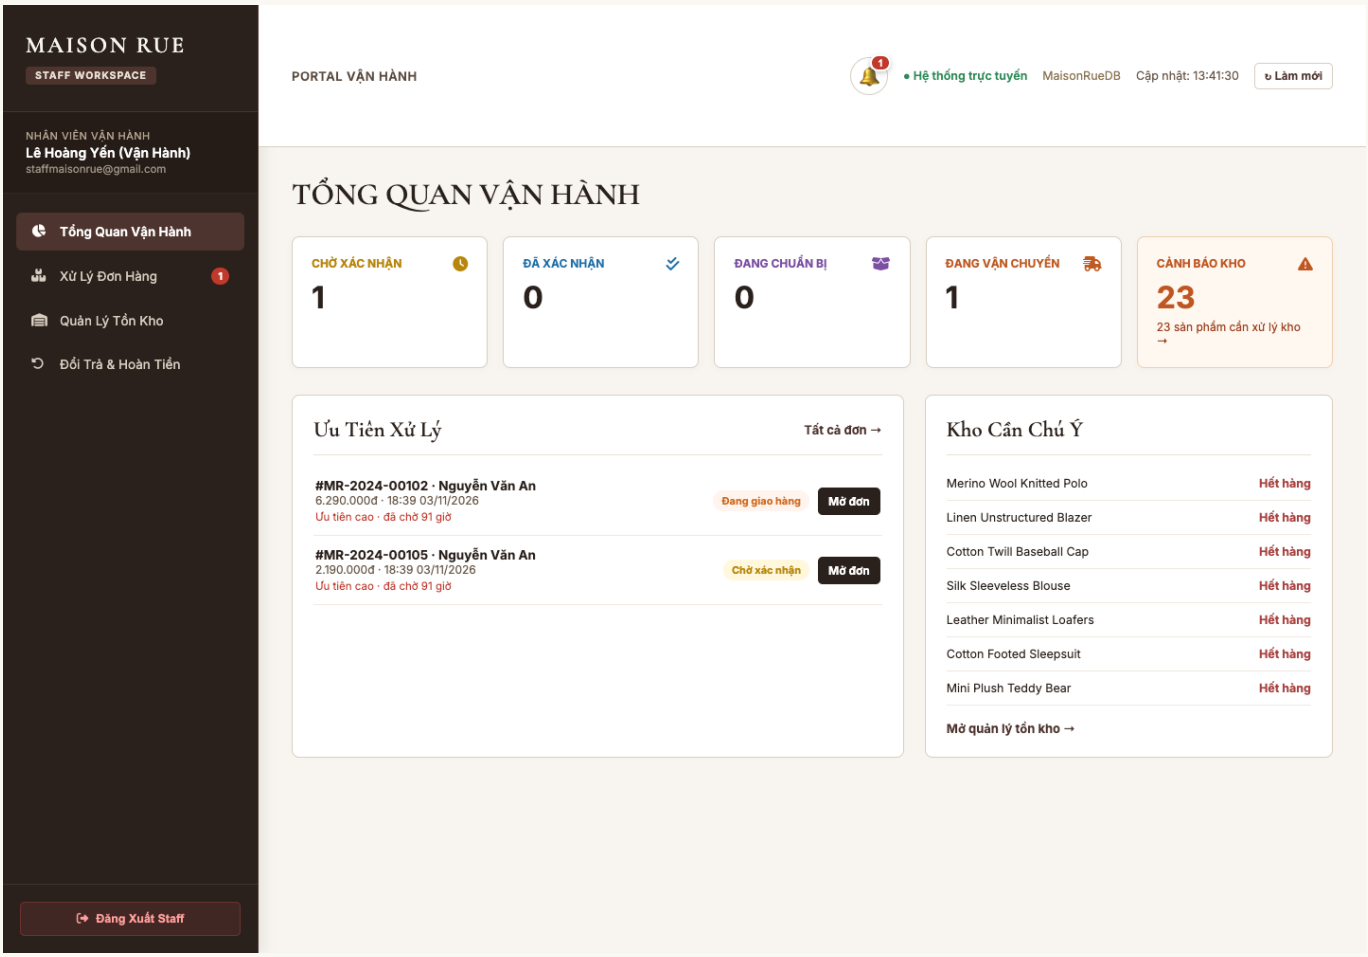

10 Customer offers

Open My Offers to see available assigned promotions. Use the relevant eligible code at checkout. An empty state means no offers are currently assigned.

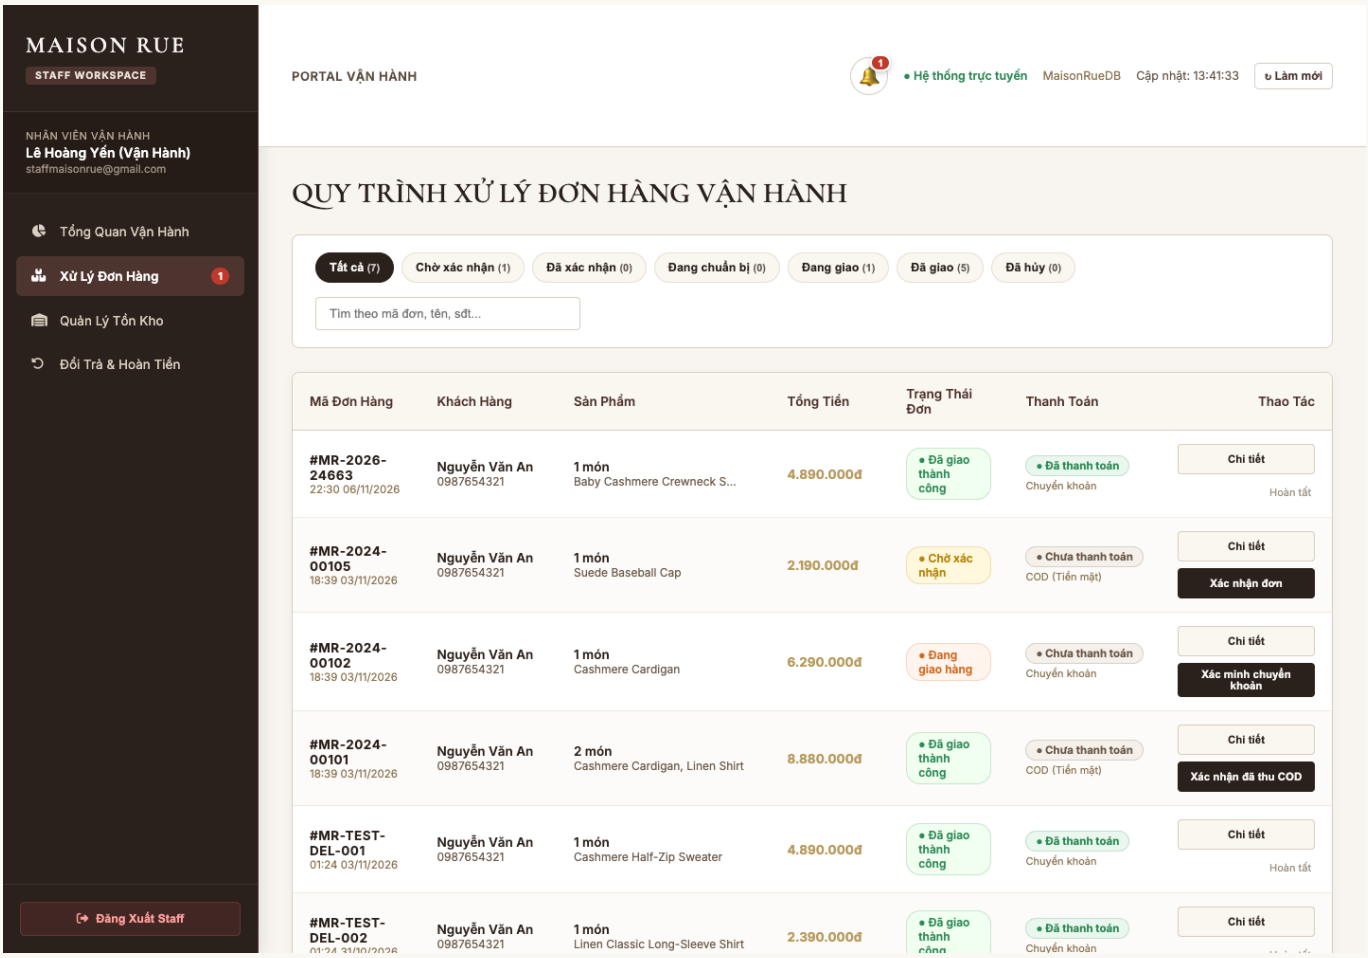

11 Staff dashboard

Sign in at /staff/login and open /staff. Review operational priorities before opening Orders, Inventory or Returns.

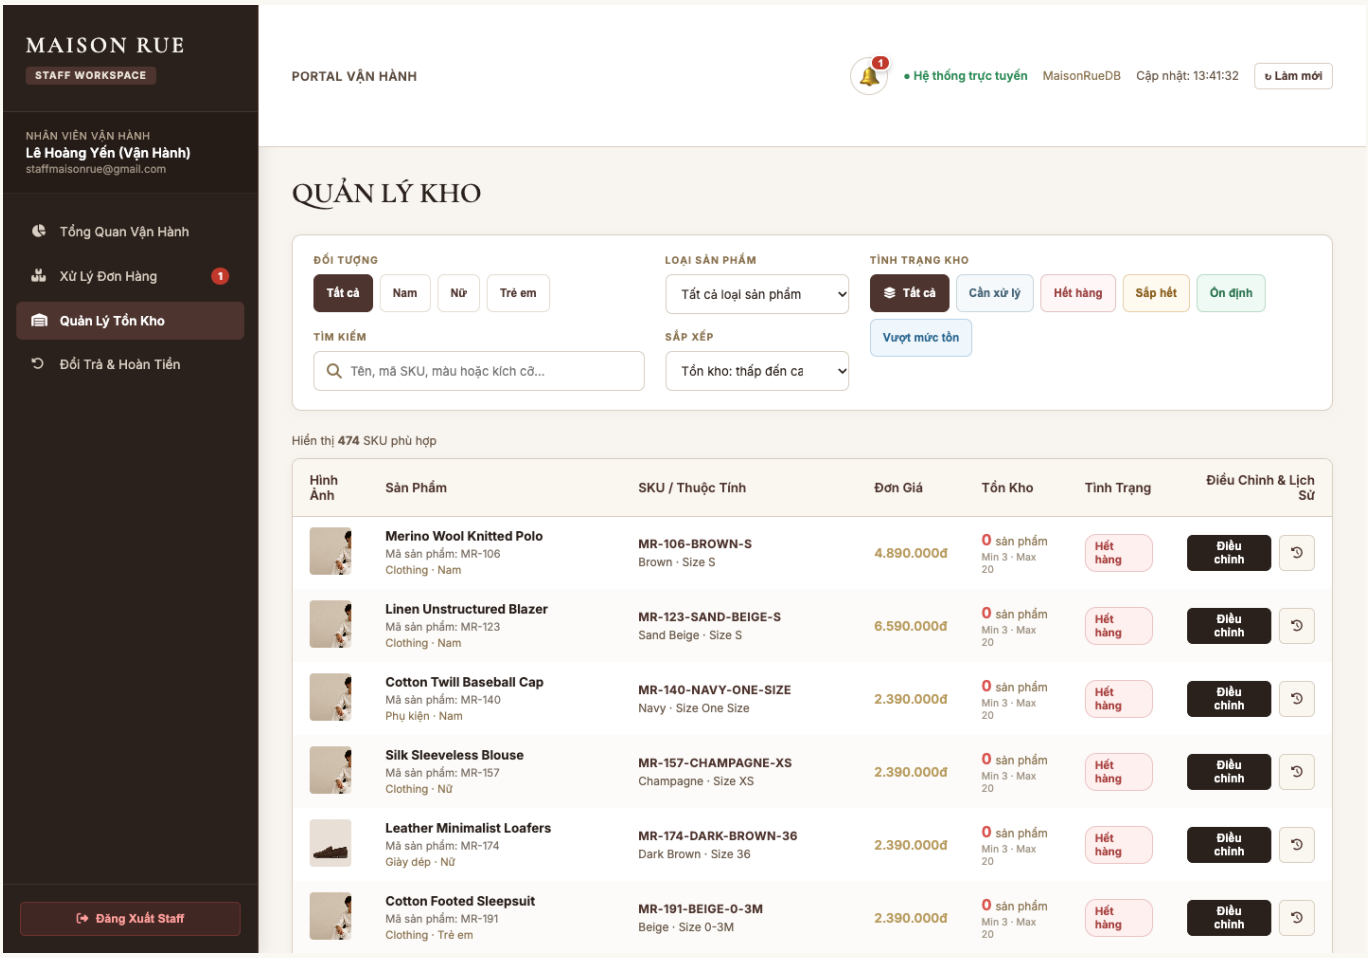

12 Order operations

Open /staff/orders. Review order details, current payment status and allowed next status. Record payment only when the actual payment has been verified.

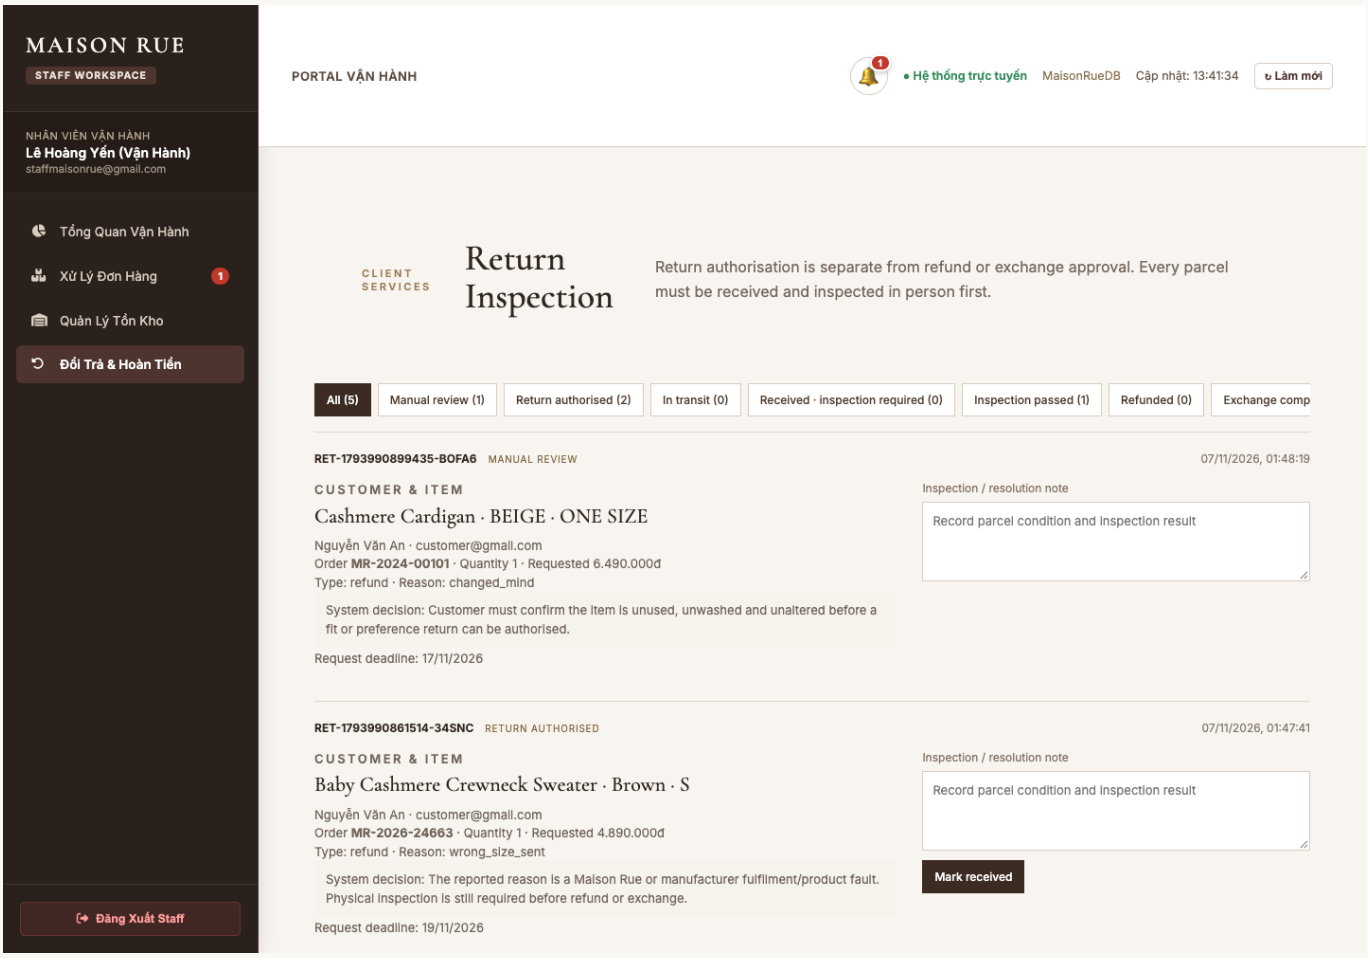

13 Inventory operations

Open /staff/inventory. Find the relevant product and variant before changing stock. Consult inventory movement history to understand adjustments.

14 Return handling

Open /staff/returns. Review the decision; receive an authorised return and enter physical inspection notes. Complete a refund or exchange only after a passed inspection.

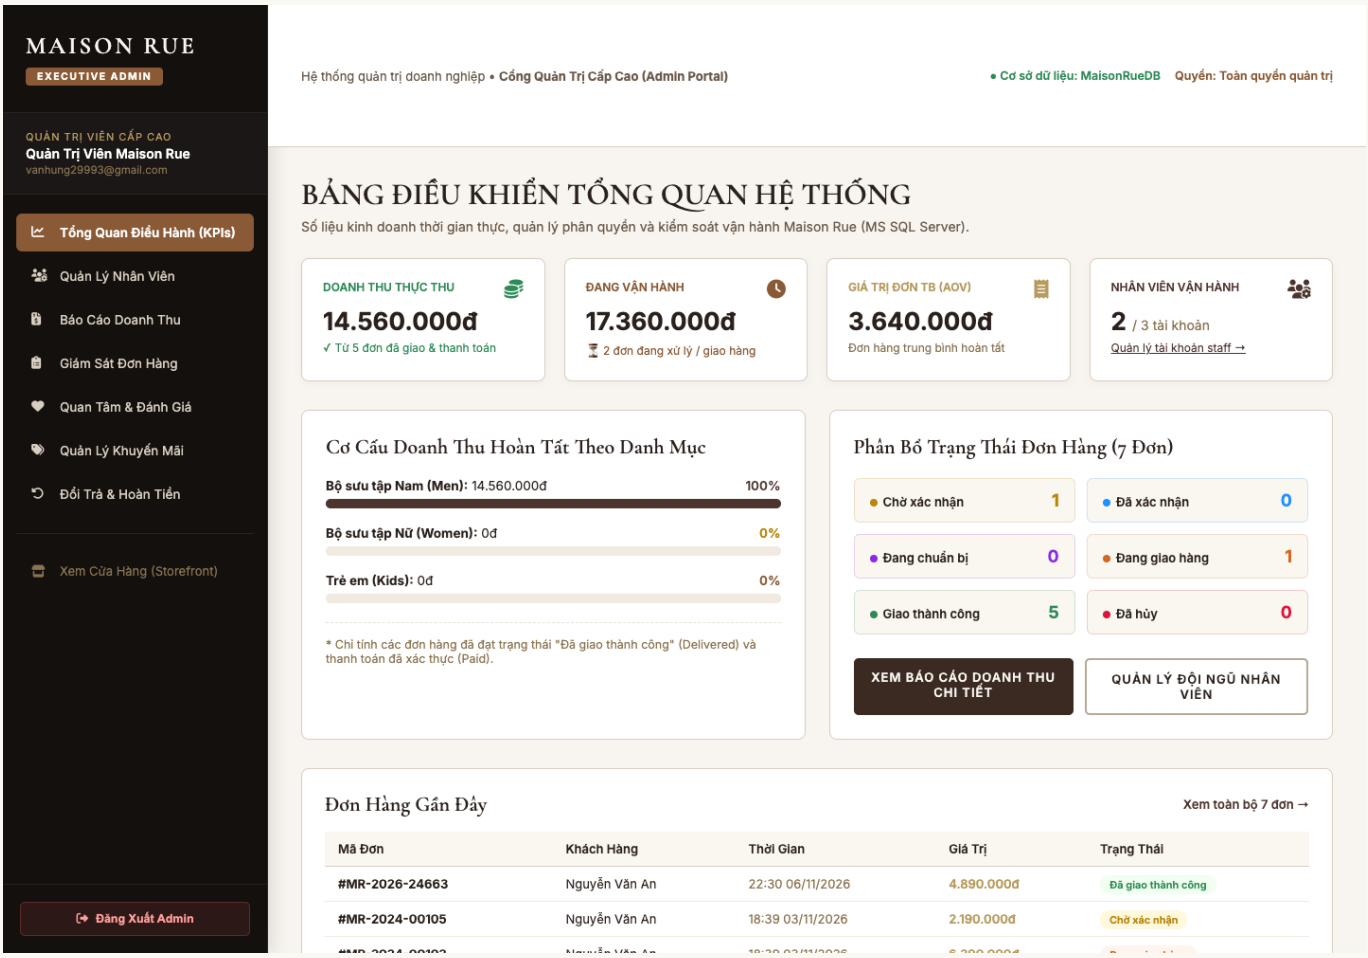

Decision and stock effects

Manual review requires a staff decision. Passed inspection precedes completion. Refund completion restores returned quantity; exchange completion also subtracts replacement quantity. Failed inspection must include a reason.

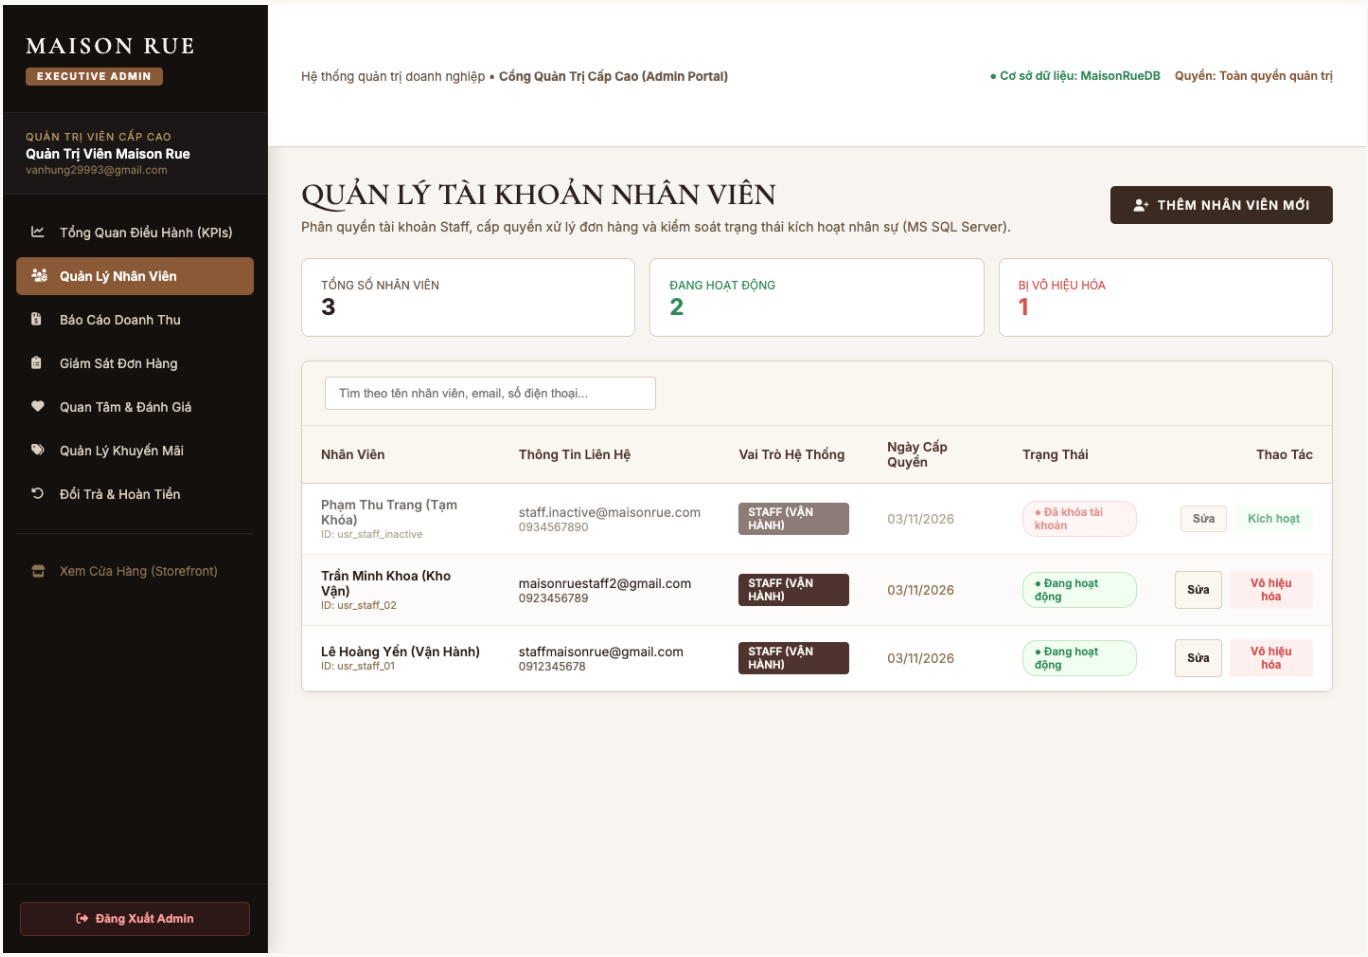

15 Administrator dashboard

Sign in at /admin/login. Use the dashboard and navigation to review sales, orders, employees, promotions, returns and reports.

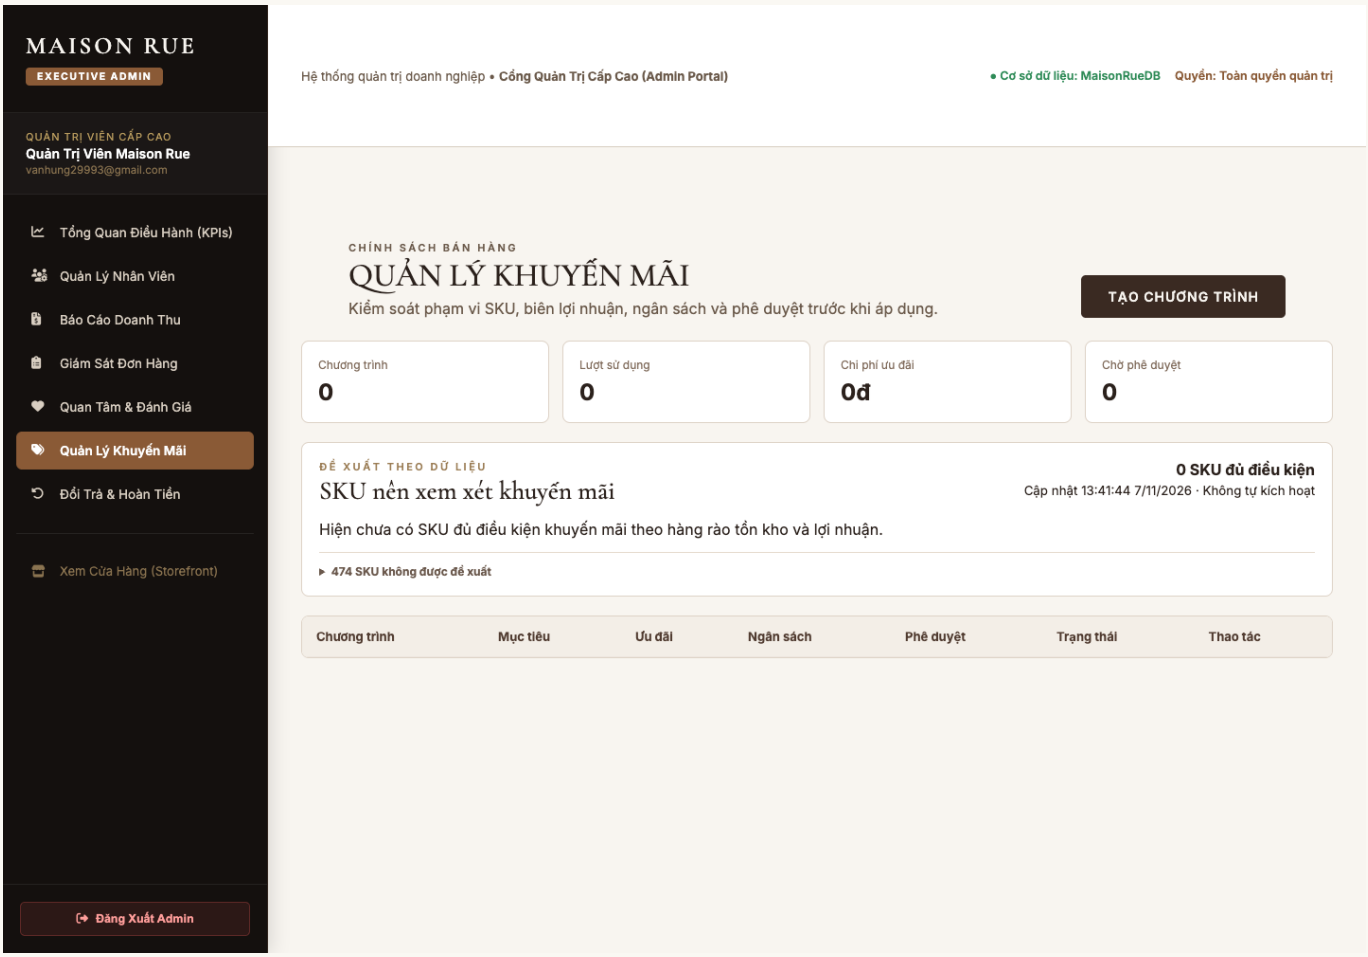

16 Employee management

Open /admin/employees. Create or edit staff records and manage active status. Deactivated accounts must not be used for normal operations.

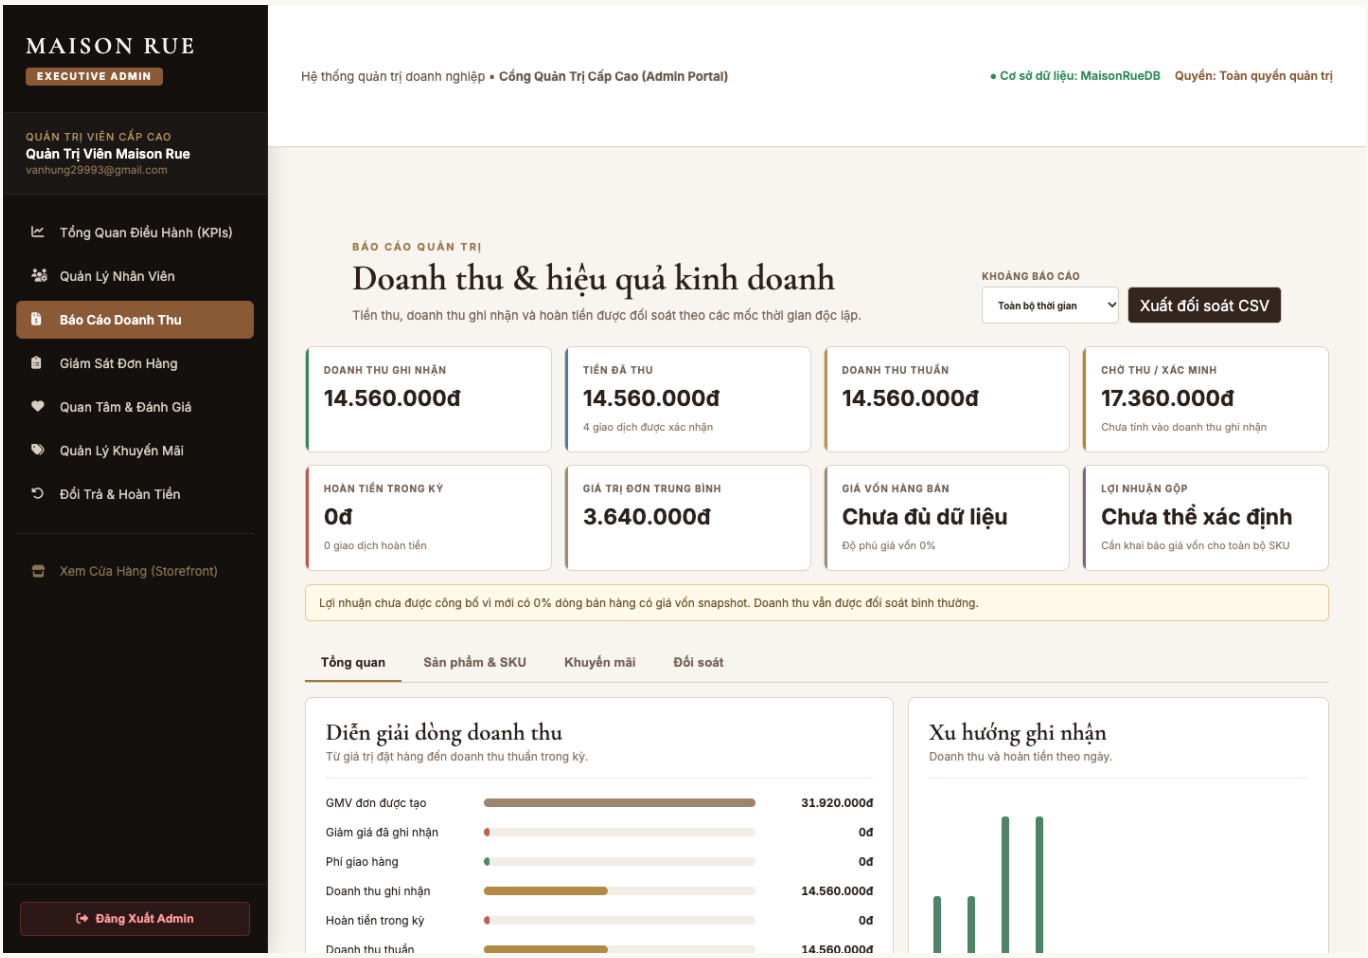

17 Promotion management

Open /admin/promotions. Define eligibility, scope and timing, simulate pricing where available and use the status or approval actions before distributing offers.

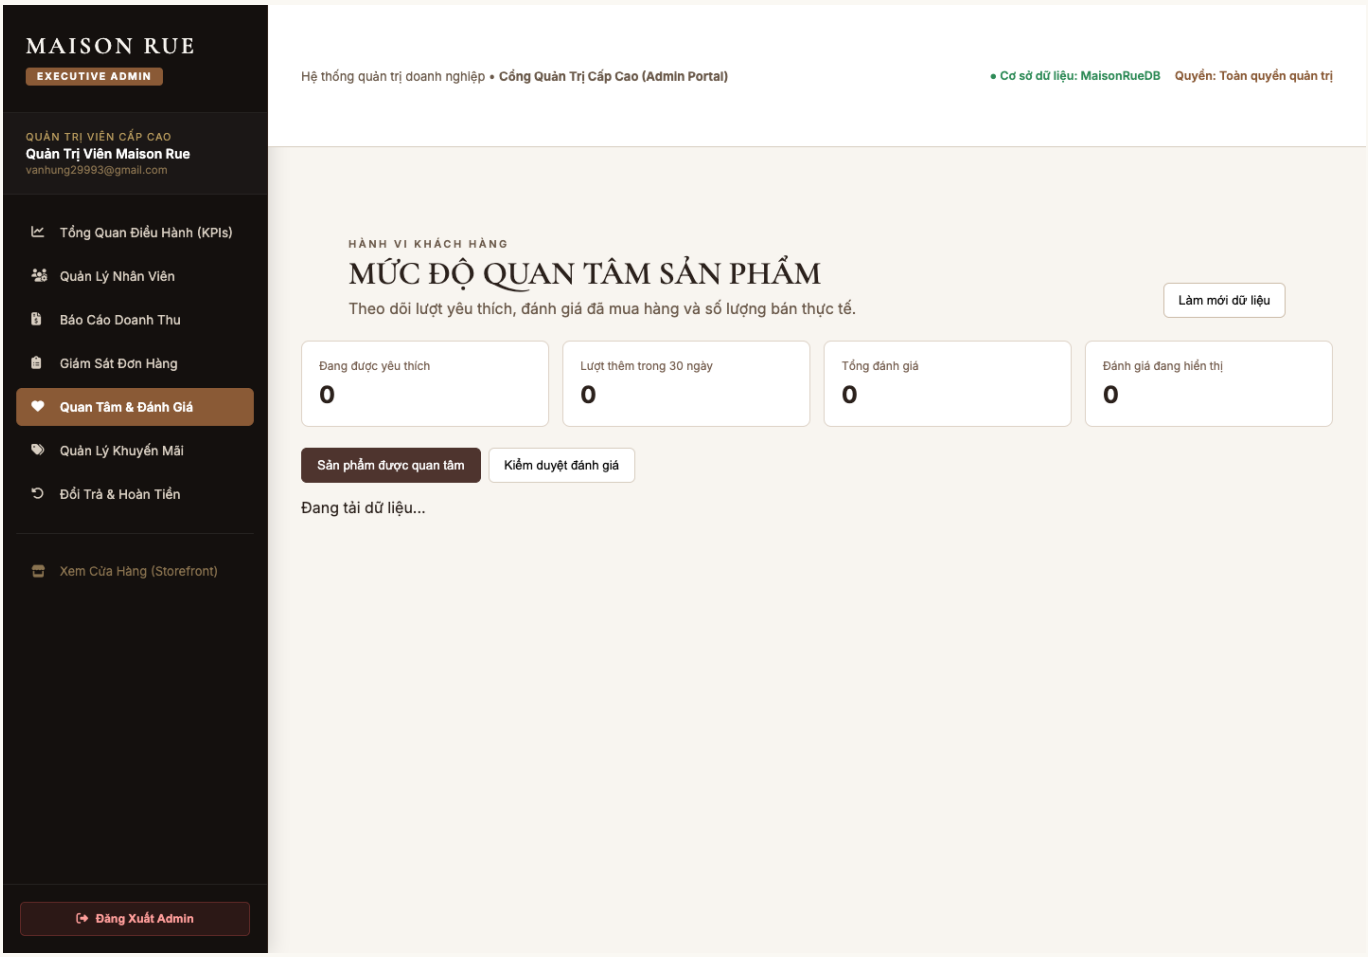

18 Revenue reporting

Open /admin/reports. Select report filters, inspect revenue and business performance and use available export controls. Demo data is not production financial evidence.

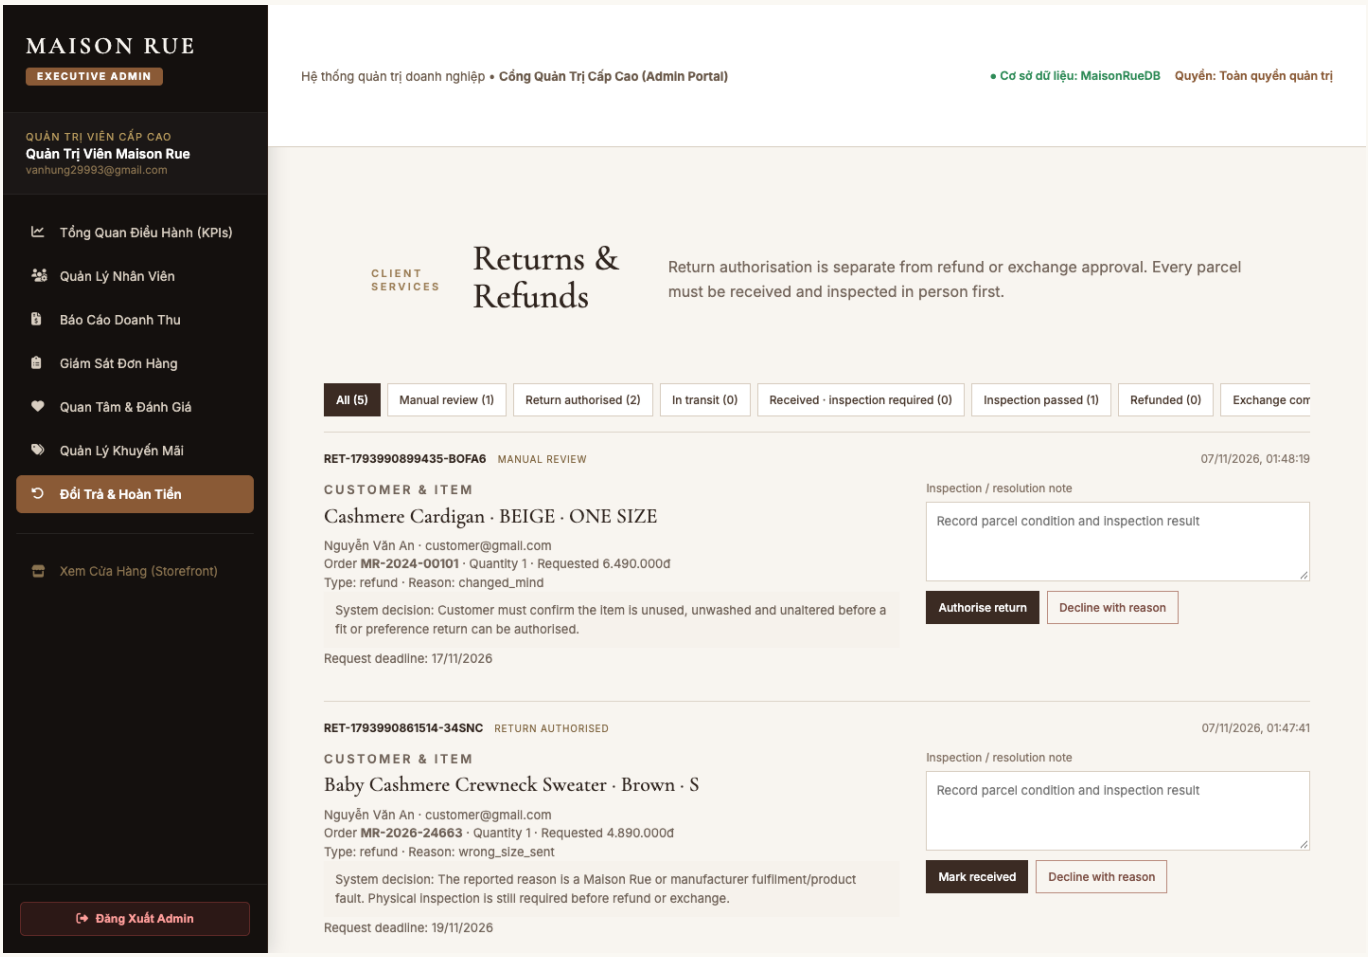

19 Product insights

Open /admin/product-insights. Review customer interest and available SKU metrics. Empty metrics can indicate that the selected period has no tracked activity.

20 Admin return oversight

Open /admin/returns. Inspect request status, notes and resolution. Automatic authorisation still requires receipt and physical assessment before completion.

Return decision reference

Automatic decline
More than 14 calendar days after the recorded delivery timestamp; invalid requested quantity; or a promotional item returned for fit, preference or change of mind rather than a store fault.

Manual review
Unconfirmed delivery; an unrecognised or Other reason; requested value of at least VND 10,000,000; at least three units in the request; or an unconfirmed unused, unwashed and unaltered condition for fit or preference returns.

Automatic authorisation
Within the time and risk limits: wrong item, wrong colour, wrong size sent, missing item, arrival damage or reported manufacturing defect. Eligible regular price fit or change of mind requests require condition confirmation.

Rule boundaries
Store fault reasons bypass the promotion exclusion, but not the earlier time limit. Value and quantity thresholds are evaluated per request, not across all requests in an order.

Reviews
Refunded items, pending requests and unsuccessful return requests block review eligibility. Successfully completed exchanges can remain eligible.

Support
For declined requests, read the decision and contact support if clarification is needed. The same item cannot simply create a duplicate request.
